Thanks for reaching out to us ... and thanks to all of your passionate forum members. We have enjoyed following the dialogue!!

We have tried our best to answer your question related to shipment timing and we will do our best to provide more information as it becomes available.

## ***INITIAL SLINGSHOT DELIVERIES ARRIVING AT DEALERSHIPS!***

Initial stocking orders for dealers did begin shipping on November 12, and are arriving at dealerships as we speak! Our plan has been to deliver two vehicles to every Slingshot dealer within the U.S. and Canada by November 26. Given the current weather conditions and the upcoming U.S. holiday, we now know that some dealers will receive their initial shipment during the first week of December. From there, we will immediately begin filling additional retail sales. Based upon the initial deposit information provided by our dealers, we believe the majority of pre-sold orders will be delivered by the end of the December. From everyone at Polaris, thank you for your patience as we work to complete delivery of these initial Slingshot shipments.

## ***FIRST OWNER OF A SLINGSHOT?***

While we can't officially confirm that he was the very first owner, we did want to congratulate SlingMods on being (one of) the first people to take possession of a Slingshot! And thanks for taking the time to post your review, it is very helpful to us...and by the way, we did want to let you know that the side view mirrors are adjustable although they may feel a little stiff during your initial adjustment!!
